Retina CS Enterprise Vulnerability Management

Intelligently Identify, Prioritize and Remediate System Vulnerabilities Across Diverse IT Environments

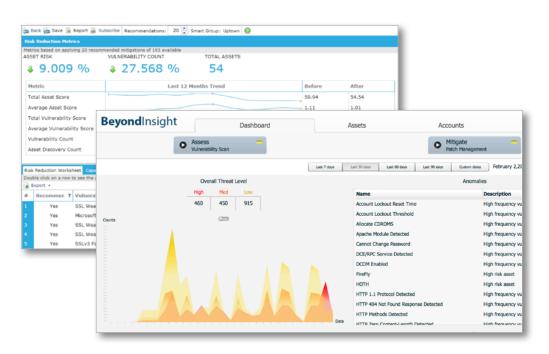

Most vulnerability management solutions do little to help security leaders put vulnerability and risk information in the context of business. Saddled with volumes of rigid data and static reports, the security team is left to manually discern real threats and determine how to act upon them. At BeyondTrust, we believe that security professionals deserve more from their vulnerability management solutions. That's why we deliver vulnerability data in the proper context.

Retina CS: The Context-Aware Vulnerability Management Solution

BeyondTrust® Retina CS is the only vulnerability management solution designed from the ground up to provide organizations with context-aware vulnerability assessment and risk analysis. Retina's results-driven architecture works with users to proactively identify security exposures, analyze business impact, and plan and conduct remediation across network, web, mobile, cloud, virtual, and IoT infrastructure.

- Discover network, web, mobile, cloud, virtual, and IoT infrastructure.
- Profile asset configuration and risk potential.
- Pinpoint vulnerabilities, malware and attacks.
- Analyze threat potential, return on remediation and more.
- Isolate high-risk assets through advanced threat analytics.
- Remediate vulnerabilities through integrated patch management.
- Report on vulnerabilities, compliance, benchmarks, etc.
- Protect endpoints against client-side attacks.

Retina CS enables you to understand and prioritize risk in the context of your business via the centralized BeyondInsight management, reporting and analytics console.

Key Capabilities

ZERO-GAP COVERAGE

Able to discover and assess any IT resource, Retina CS offers zero-gap coverage of the largest, most diverse IT environments. Agentless and agent-based scanning protects both online and offline assets.

UNMATCHED REPORTING

With the most powerful reporting capabilities in its class, Retina CS makes it easy to make smarter decisions, communicate risk, and report remediation progress to executives and compliance auditors.

ADVANCED THREAT ANALYTICS

With BeyondInsight Clarity, Retina CS discovers data breach threats typically missed by other vulnerability solutions. Clarity pinpoints specific, high-risk users and assets by correlating privilege, vulnerability and threat data from a variety of BeyondTrust and third-party solutions.

AUTOMATED CREDENTIALED SCANS

Together with BeyondTrust
PowerBroker Password Safe, Retina
CS provides a secure and automated
solution for performing authenticated
scans with continuously rotating
privileged credentials.

EXTENSIVE COMPLIANCE COVERAGE

Reporting for COBIT, GLBA, HIPAA, HITRUST, ISO, ITIL, NERC-FERC, NIST, PCI, SOX, and many more government & industry regulations.

ENTERPRISE SCALABILITY AND FLEXIBILITY

Retina's multi-tier architecture is designed for simple deployment and management of networks with multiple firewalls, IDS/IPS, VLANS and disparate locations.

BeyondInsight Threat and Vulnerability Intelligence

Retina CS is part of BeyondInsight
Threat and Vulnerability Intelligence,
which provides centralized
management, policy, reporting, and
analytics for BeyondTrust PowerBroker
privileged access management and
Retina vulnerability management
solutions. Capabilities include:

- Centralized solution management and control via common dashboards
- Asset discovery, profiling and grouping
- Reporting and analytics
- Workflow and ticketing
- Data sharing between Retina and PowerBroker solutions

With BeyondInsight, IT and Security teams have a single console through which to view user and asset risk.

UNMATCHED REPORTING & ANALYTICS

Results-Driven Architecture Tailor scans to specific reporting and compliance requirements.

- Advanced Threat Analytics
 Detect critical threats thru volumes of data.
- Resource Planning

Run what-if scenarios and team capacity analyses to plan resource allocation.

- 270+ Actionable Reports
 Communicate with technical and non-technical audiences.
- Compliance Reporting
 COBIT, GLBA, HIPAA, HITRUST, ISO-27002,
 ITIL, MASS 201, NERC-FERC, NIST, PCI,
 SOX and more.
- Advanced Threat Intelligence
 Based on asset scoring, security research, exploit databases, exploitability, NSRL, CVSS v3, CWE, and more.
- Trends, Deltas and Heat Maps
 Share progress with executives, compliance auditors and others.
- Configuration Benchmarking
 DISA Gold Disk, SCAP, NIST, FDCC, USGCB, CIS, Microsoft®, and in-house policies; CIS Security Benchmark certified (optional).
- SLA Compliance Reports
 Measure threat severity level against dynamic asset groupings.
- Pivot Grid Ad-Hoc Reporting Create custom reports.
- Third-Party Integration
 SIEM, GRC, NMS and help desk integration

MAXIMUM FLEXIBILITY

Flexible Deployment
 Deploy software appliances an

Deploy software, appliances and/or virtual machines.

- Centralized Dashboards
 Consolidate enterprise-wide activities.
- Integrated Data Warehouse Analyze historical data over time.
- Role-Based Access

Provide permissioned access to view, assess and report on data.

Effortless Updates and Upgrades
 Expand capabilities via license updates.

ZERO-GAP COVERAGE

- Vulnerability Assessment
 Flag vulnerabilities, attacks, and malware by asset for a complete view of risk.
- Comprehensive Discovery
 Locate network (local and remote), web, mobile, cloud, virtual and IoT assets.
- Asset Profiling
 Gather information including IP, DNS, OS,
 MAC address, ports, services, software,
 processes, hardware, event logs and more.
- Asset Smart Groups
 Group, assess, and report on assets by IP range, naming convention, OS, domain, applications, business function and more.
- Asset Context Awareness
 Evaluate risk based on damage potential or target distribution, plus confidentiality, integrity and availability requirements.
- Smart Credentials
 Automatically scan targets using the highest privilege level.
- Asset Risk Analysis
 Compare asset risk levels with custom
 Threat Risk and Exposure Risk scoring.
- Cloud Scanning
 Scan online & offline Amazon°, GoGrid°,
 Google°, IBM°, Rackspace° & VMware°.
- VMware Verified
 Scan virtual environments requiring PCI and HIPAA compliance.
- Patch Management
 Remediate with patch management for
 Microsoft WSUS and SCCM for Microsoft
 and third-party applications.
- Scheduling and Alerts
 Schedule scans and configure email alerts.

ENTERPRISE SCALABILITY

- N-Tier, Multitenant Architecture
 Gain maximum scalability and control.
- Scan Engine Pooling
 Combine scan engines, each able to scan
 a Class-A network in under 15 minutes.
- Retina Protection Agent
 Local scanning, zero-day monitoring, and intrusion prevention for offline devices.
- Local and Remote Scanning
 Cover segregated, firewalled and disparate infrastructure.
